Practiced Full Stack Developer with proven experience developing interactive components and web application within an AGILE environment. Solution-driven and adept at contributing to a highly collaborative work environment, finding solutions and determining the best way forward. Built products for desktop and mobile app users, meeting highest standards for web design, user experience, best practices and accessibility using a variety of technologies, frame works and libraries. I am comfortable using API's, third-party integrations as well as managing both SQL and NoSQL databases. Trained in the MERN stack with a mobile first approach.
